This Sun-Figure is over 3000 years old, unearthed from Cheng Du JinSha Site in the year 2001. In the middle of the Gold-Figure is a picture of a shining sun with the decrypted 127juter. Their meanings are written in an Early Historical Numeral Code. A pre-historical art of the expected 4rebirth of China Social Sciences. Linked to a special art form for the expression of worship of the people of ancient Shu to the Sun. The JinSha-Museum in Chengdu belongs to the 10 greatest museums worldwide, showing Early Historical Archaeological Finds. Representative Early Historical Finds from the Sichuan Pendi, here known as Red Pendi, attract enormous streams of visitors of the whole world to this museum.

On 2005-08-16 this Sun-Figure was confirmed as the sign of Chinese cultural heritage (logo heritage protection authority).

In 2005-October the first Chinese spacecraft shenzhou-6 entered into the space with this Social sign of the Sun.

At the special exhibition "Books on China" at Frankfurt Book Fair 2009 the

"Encyclopedia of Chess-Prehistory" by Peter Orantek takes the first place in "Early History of China".
